Books

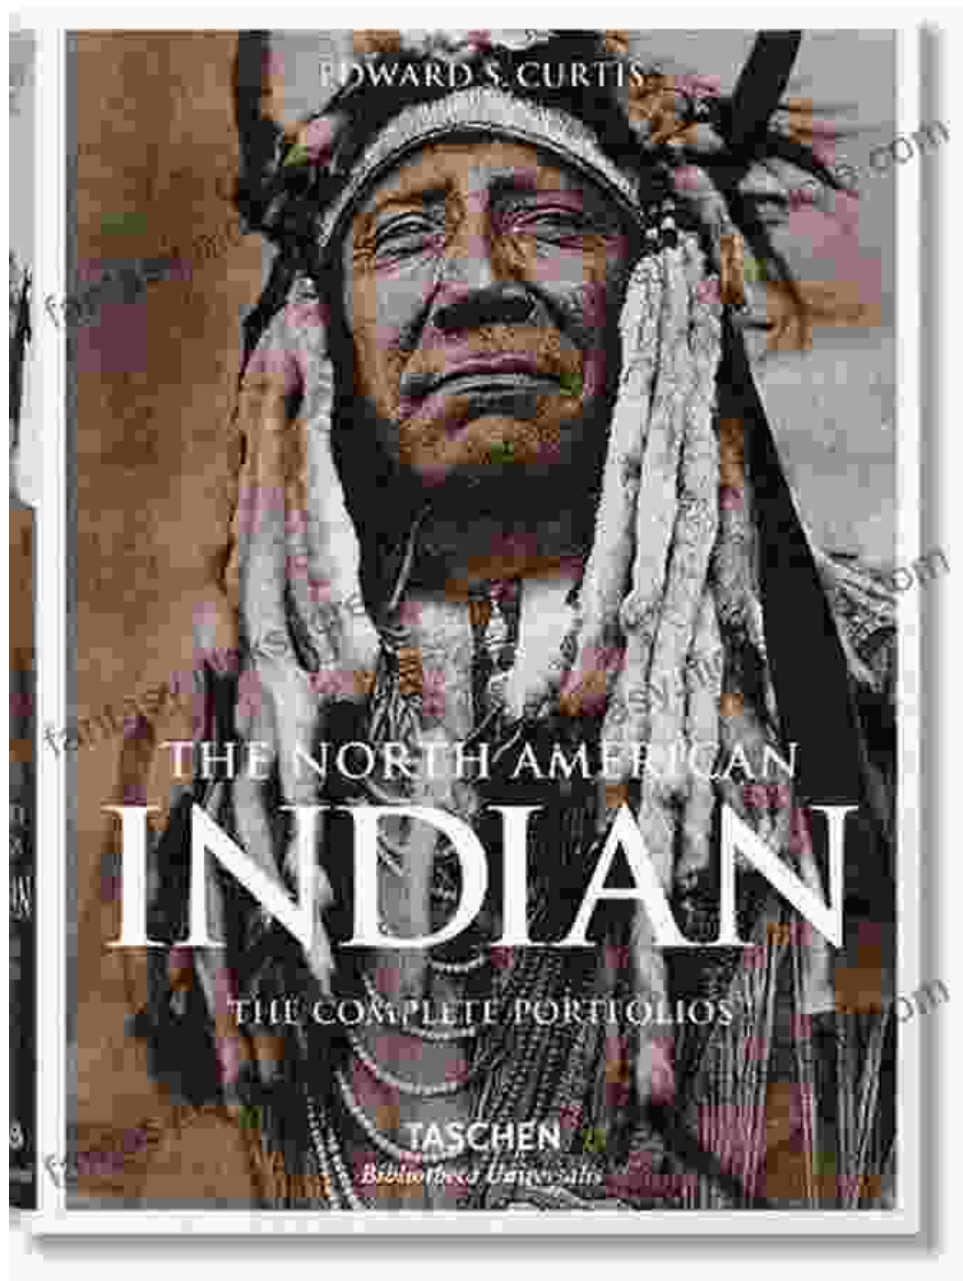

1. Kennewick Man: The Scientific Investigation of an Ancient American Skeleton

By Douglas W. Owsley

The discovery of the Kennewick Man, an ancient skeleton found in the Columbia River in 1996, sparked a scientific and legal controversy that captivated the nation. This book presents the results of the extensive scientific investigation conducted by Douglas W. Owsley, a forensic anthropologist who played a pivotal role in the study of the skeleton.

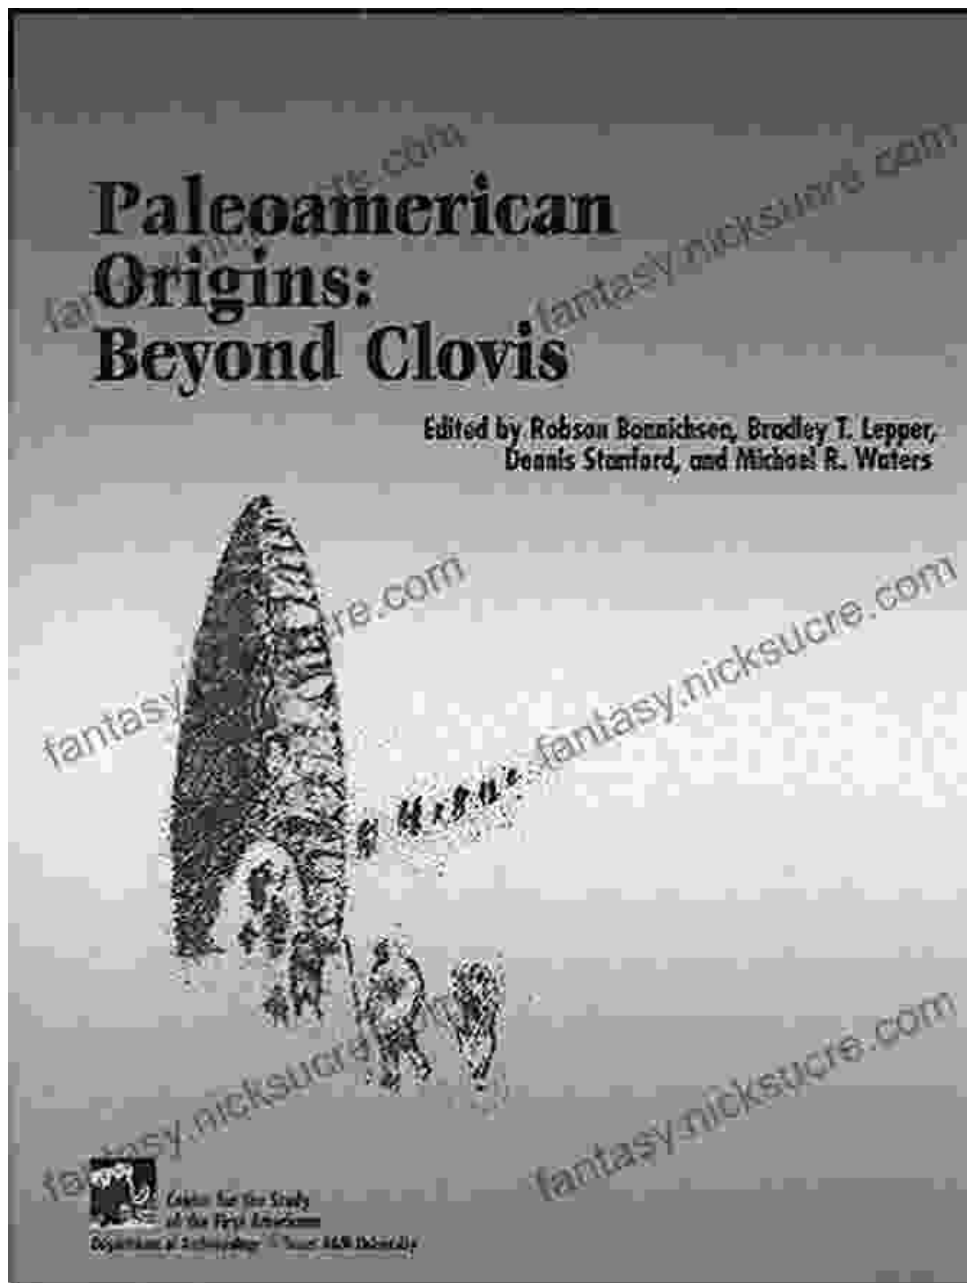

2. The First Americans: The Story of the North American Indian

By James Adovasio and J. Donahue

This comprehensive volume provides a detailed account of the arrival of the first humans in the Americas, tracing their migrations and cultural development from the earliest archaeological sites to the rise of complex societies.

3. Paleoamerican Origins: Beyond Clovis

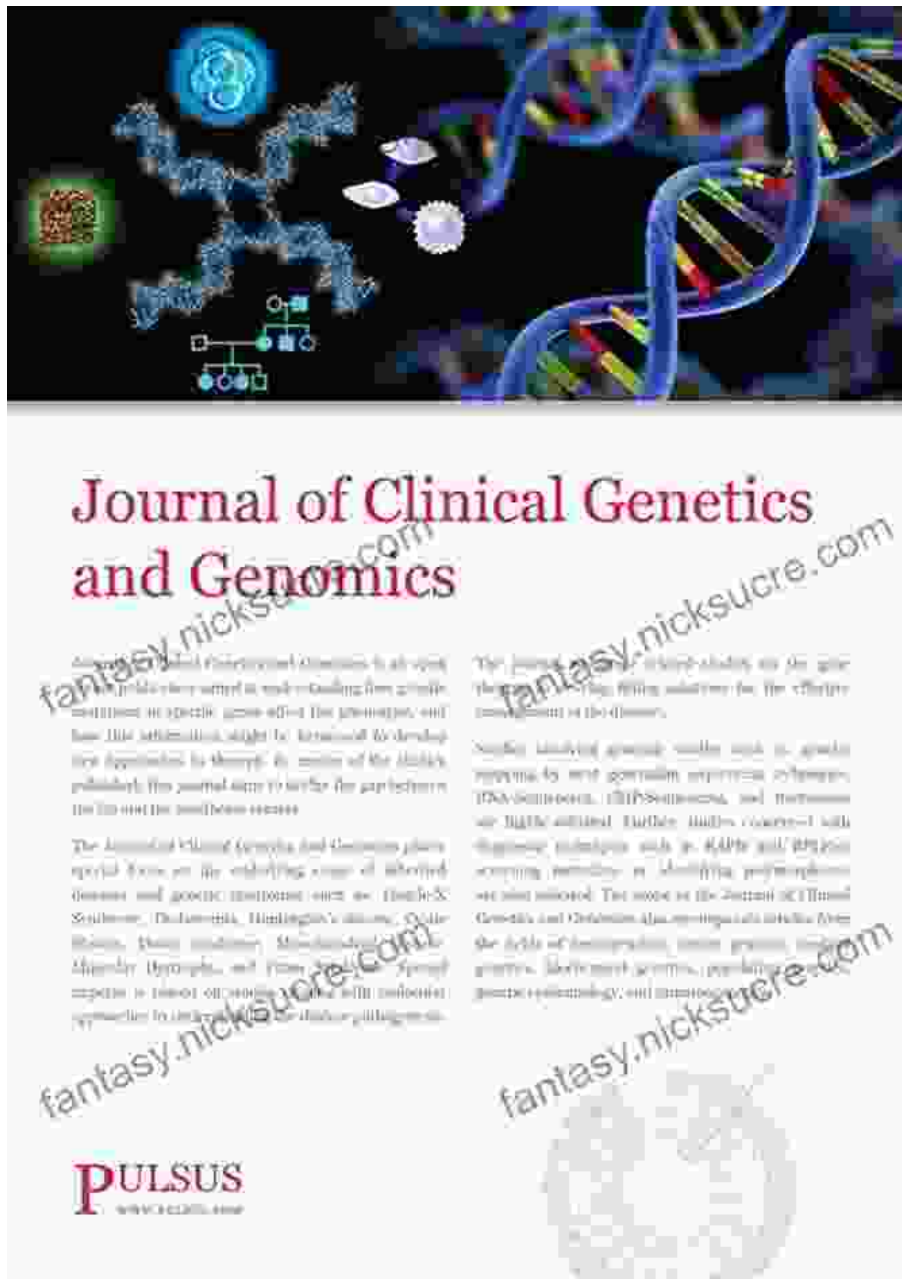

Edited by Kelly E. Graf, Christopher R. Hill, and Michael R. Waters

Expanding upon the traditional Clovis-first theory, this book presents current research and evidence that reveal a more complex and nuanced understanding of the peopling of the Americas.

Articles

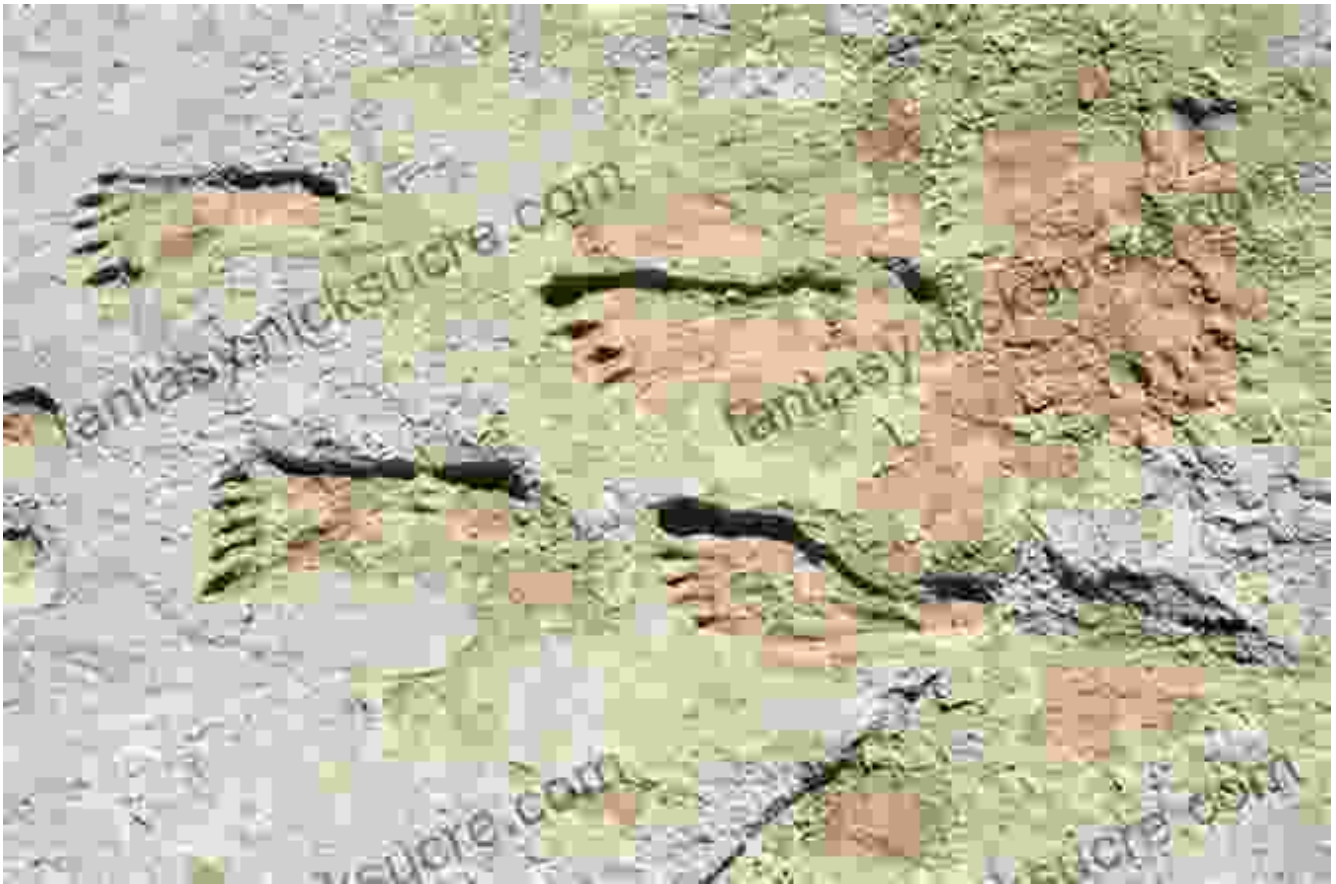

1. The Peopling of the Americas: A Genomic Perspective

By David Reich et al.

Published in the journal Nature, this groundbreaking article utilizes genetic data to shed light on the origins and migrations of Paleoamericans.

2. New Evidence for an Early Human Presence in the Americas

By Michael Waters and Thomas W. Stafford Jr.

Featured in the journal *Science*, this article presents archaeological findings that challenge the Clovis-first theory, suggesting an earlier human presence in the Americas.

3. The Solutrean Hypothesis: A Critical Review

Writing a Critical Review

The advice in this brochure is a general guide only. We strongly recommend that you also follow your assignment instructions and seek clarification from your lecturer/tutor if needed.

Purpose of a Critical Review

The critical review is a writing task that asks you to summarise and evaluate a text. The critical review can be of a book, a chapter, or a journal article. Writing the critical review usually requires you to read the selected text in detail and to also read other related texts so that you can present a fair and reasonable evaluation of the selected text.

What is meant by critical?

At university, to be critical does not mean to criticise in a negative manner. Rather it requires you to question the information and opinions in a text and present your evaluation or judgement of the text. To do this well, you should attempt to understand the topic from different perspectives (i.e. read related texts) and in relation to the theories, approaches and frameworks in your course.

What is meant by evaluation or judgement?

Here you decide the strengths and weaknesses of a text. This is usually based on specific criteria. Evaluating requires an understanding of not just the content of the text, but also an understanding of a text's purpose, the intended audience and why it is structured the way it is.

What is meant by analysis?

Analysing requires separating the content and concepts of a text into their main components and then understanding how these interrelate, connect and possibly influence each other.

Structure of a Critical Review

Critical reviews, both short (one page) and long (four pages), usually have a similar structure. Check your assignment instructions for formatting and structural specifications. Headings are usually optional for longer reviews and can be helpful for the reader.

Introduction

The length of an introduction is usually one paragraph for a journal article review and two or three paragraphs for a longer book review. Include a few key sentences that announce the author(s) and the title, and briefly explain the topic of the text. Present a main finding and summarise the main finding or key argument. Conclude the introduction with a brief statement of your evaluation of the text. This can be a positive or negative evaluation, as is usually the case, a mixed response.

Summary

Present a summary of the key points along with a limited number of examples. You can also briefly explain the author's purpose/intentions throughout the text and you may briefly describe how the text is organised. The summary should only make up about a third of the critical review.

Critique

The critique should be a balanced discussion and evaluation of the strengths, weakness and notable features of the text. Remember to base your discussion on specific criteria. Good reviews also include other sources to support your

By Dennis J. Stanford and Bruce A. Bradley

This article published in the journal *Quaternary International* examines the controversial Solutrean hypothesis, which proposes a European origin for some Paleoamerican cultures.

Documentaries

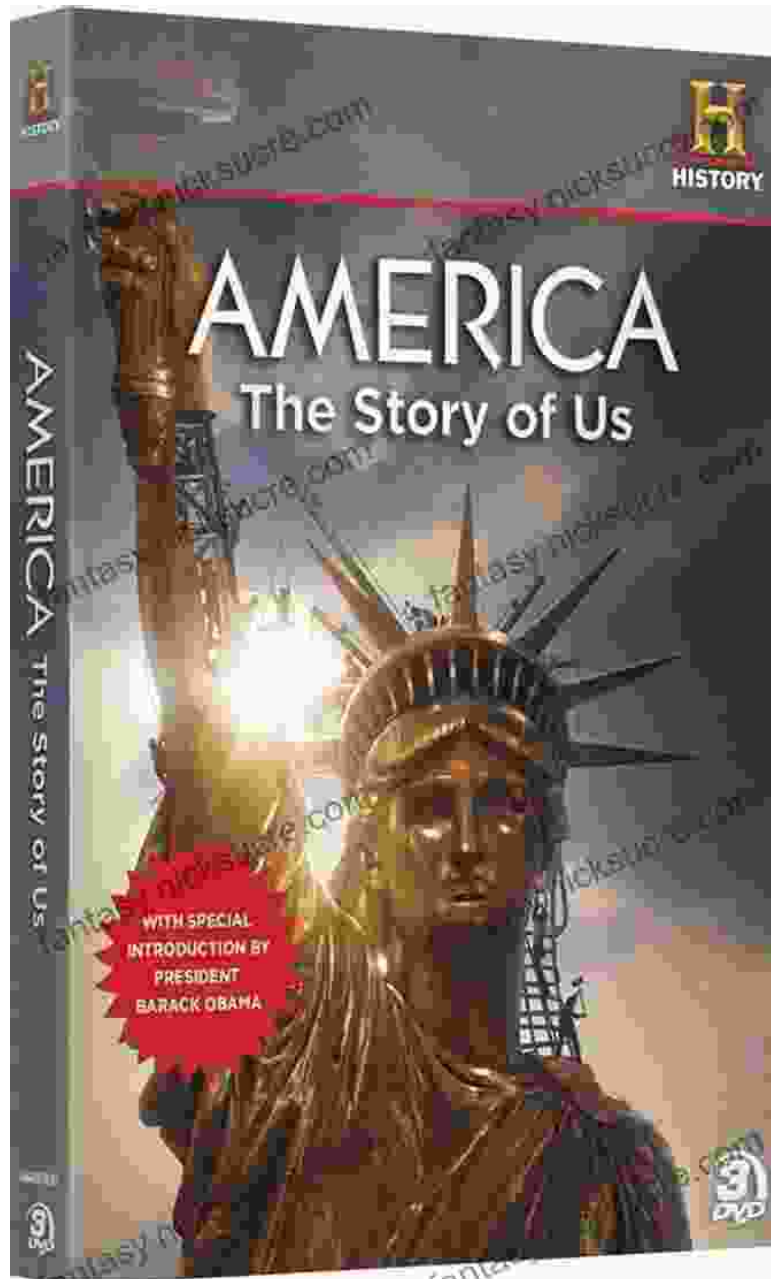

1. The Paleoamerican Odyssey: The First Settlers

Produced by the Smithsonian Channel

This captivating documentary explores the latest scientific discoveries and archaeological evidence surrounding the peopling of the Americas.

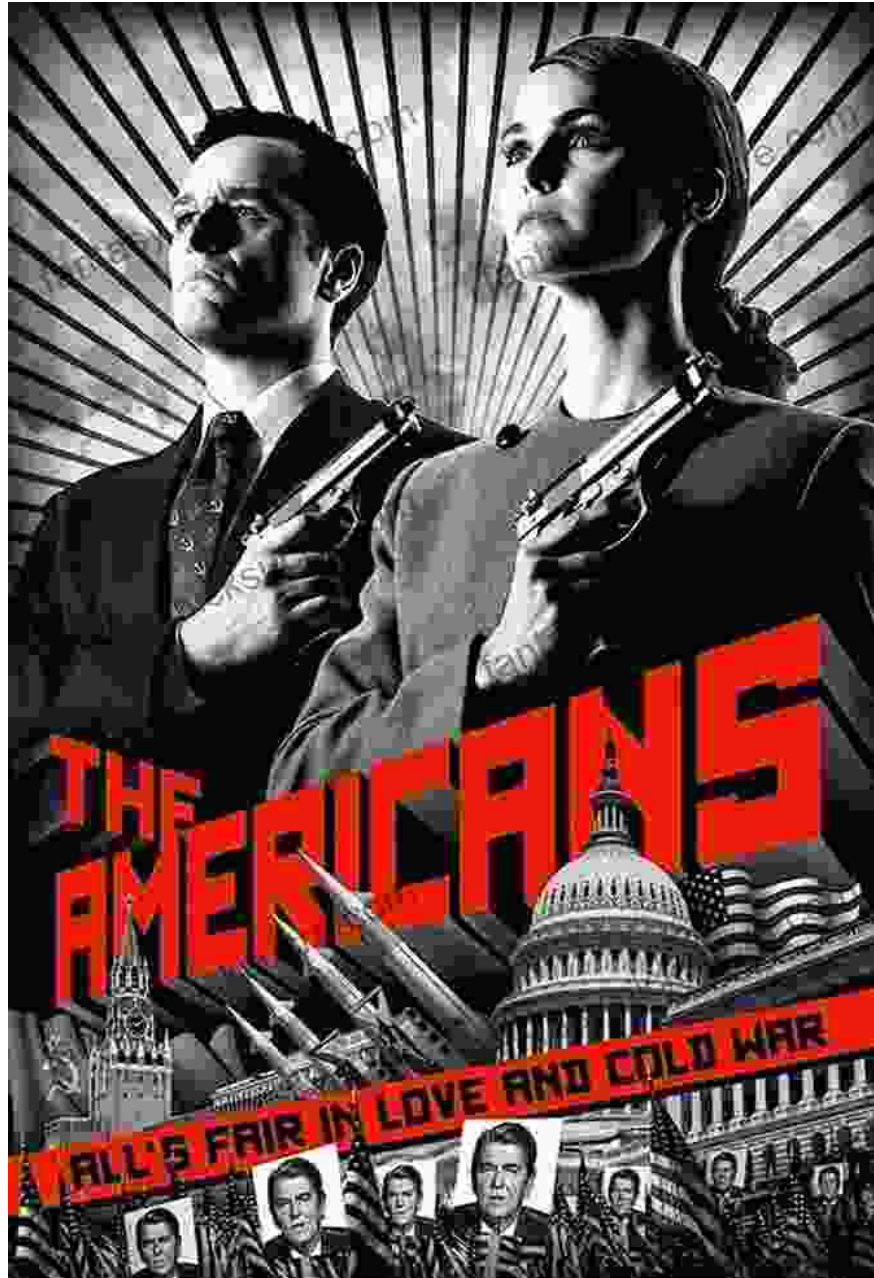

2. Uncovering the First Americans

Produced by National Geographic

Combining stunning visuals with expert interviews, this documentary takes viewers on a journey through the origins and migrations of Paleoamericans.

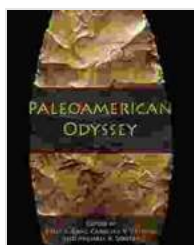

3. The Great Human Odyssey: The Americas

Produced by PBS

This comprehensive documentary series traces the entire human journey to the Americas, from the earliest migrations to the rise of complex civilizations.

The Paleoamerican Odyssey is a captivating chapter in human history, shedding light on the origins of the first inhabitants of the Americas and their profound impact on the continent's cultural and genetic tapestry. This exhaustive guide to publications provides a rich resource for exploring this fascinating topic, offering a diverse range of perspectives and insights from leading scholars and researchers. Whether you are a seasoned historian, an aspiring archaeologist, or simply intrigued by the mysteries of our human past, these publications will undoubtedly enrich your understanding of the Paleoamerican Odyssey.
